Total	8,859	13,906	22,765
Percent Positive	23.8%	2.5%	10.8%

Percent Positivity Calculation: Test over Test - used by CDC = (# of positive tests) / (# positive tests + # negative tests)

Initial Tests include one test per person, the very first positive test of positive cases and the very first test of negative cases.

The Percent Positive rate in Initial Tests is equivalent to: People over People = (# of people with positive tests) / (# of people with positive tests + # of people with negative tests)

The indeterminate results (cancellation, rejection, comment, invalid, inclusive, pending) were excluded from the denominator.
