

# Phase Approach

## Gila River Indian Community

The Gila River Indian Community (GRIC) is utilizing a phased in approach to return to a full on-site workforce. In order to do so, GRIC will transition between phases based upon changing conditions regarding the risk of COVID-19. Changes will be determined by the Tribal Health Department based on bi-weekly data reports and reviewed by the COVID-19 Taskforce and Leadership.

- **Current Status:** The percent test positivity rate for positive cases in GRIC is less than 1%.

The Gila River Indian Community is now in

Phase III at 100%

of its workforce until further notice.

- Management of the Departments/Entities/Organizations should relay their current workforce percentage to their employees.
- Employees should also contact their Supervisor/Manager/Director if they have any questions regarding their phased in approach.

## Planning Ahead

The Tribal Health Department, COVID-19 Taskforce and Leadership will continue to monitor the risk of COVID-19 transmissibility and make necessary adjustments if required.
